Total number of hits satisfying chosen parameters:

    No. is the number of results predicted by chance to have a
re greater than or equal to the score of the result being printed,
is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Minimum Match 0%

SUBCELULAR LOCATION: Nuclear.

ITISSUE SPECIFICITY: EXPRESSED IN BOTH HEMATOPOIETIC NONHEMATOPOIETIC TISSUES.

INDUCTION: SPECIFICALLY UP-REGULATED IN LEUKEMIC CLC F-MULV INSERTIONS UP-STREAM OF THE FLI-1 LOCUS.

IDISEASE: INVOLVED IN ERYTHROLEUKEMIA INDUCTION BY FF LEUKEMIA VIRUS (F-MULV).

SIMILARITY: BELONGS TO THE ETS FAMILY.

SIMILARITY: CONTAINS 1 POINTED (PMT) DOMAIN.
